

AquaBeauty Valve

For energizing and activating water

Beneficial for haircare & Skincare

Enhancing shampoo forming
Gentle to the skin

Maintenance free

No elements to be replaced

Easy installation

Designed for easy installation by anyone

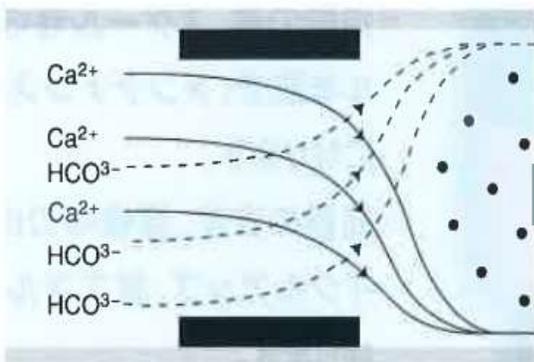

Available for reasonable

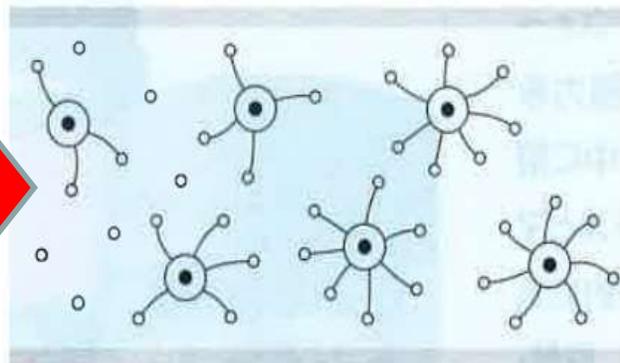

No running cost

When hot/cold water passes through the ultra-strong permanent magnet (internationally patented) built into the Ionic water valve, the positive and negative ions dissolved in the water are combined to forcibly generate scale and sludge (CaCO_3), which adsorb other ions while floating in the water without adhering to equipment or piping, and then grow and drain. After these scales and sludges are removed, a black rust protective film is formed on the surface.
